

Depression Detection Report

Generated: 2025-11-13 11:05:28

Final Classification: Depressed

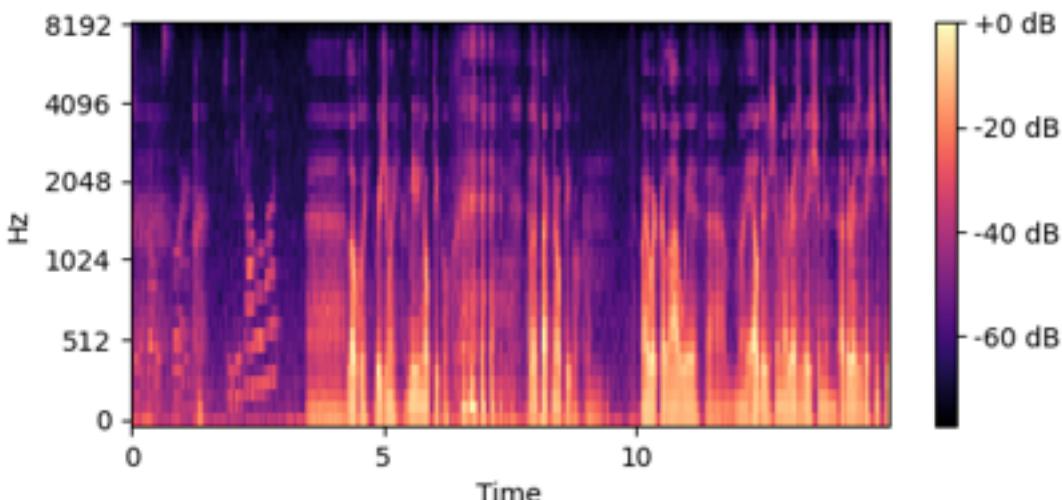

Final Probability: 0.5077

Segment 1 | Probability: 0.4417

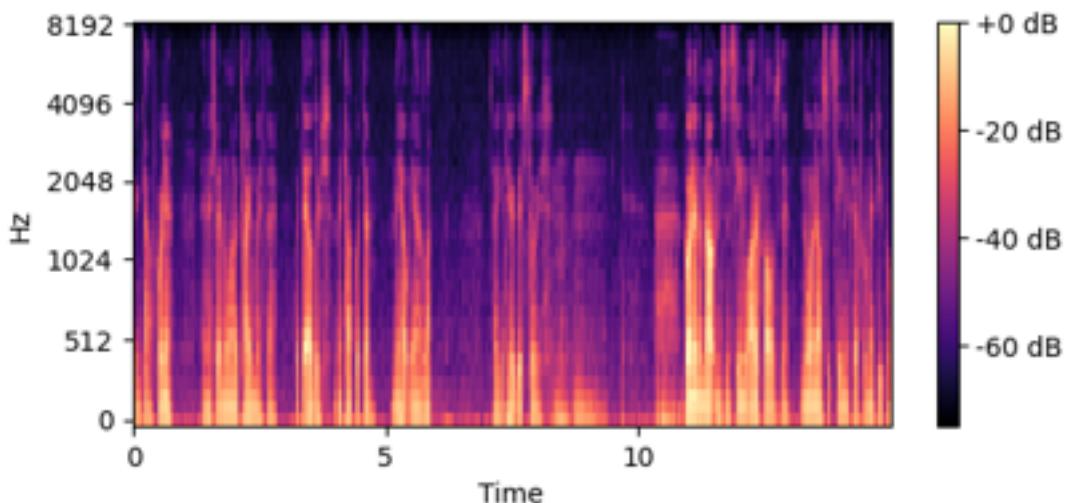

Yes, I'm doing good. Los Angeles. Convenience. Convenience. People, the crowd, traffic, people lack of respect.

Segment 2 | Probability: 0.4788

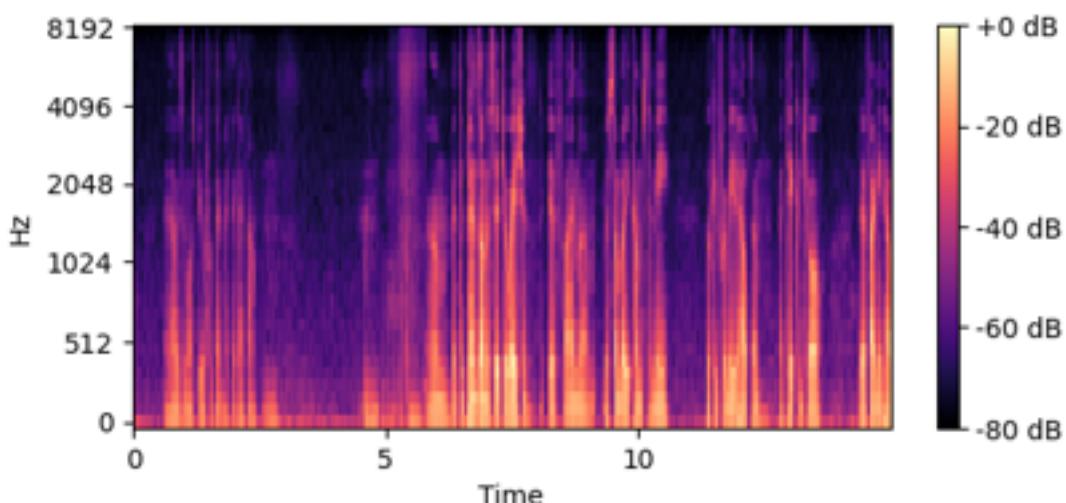

Do you travel a lot? Locally, regionally, meeting no people. I love talking to no people. I work a lot with my elders and my reservation and other reservations here.

Segment 3 | Probability: 0.5242

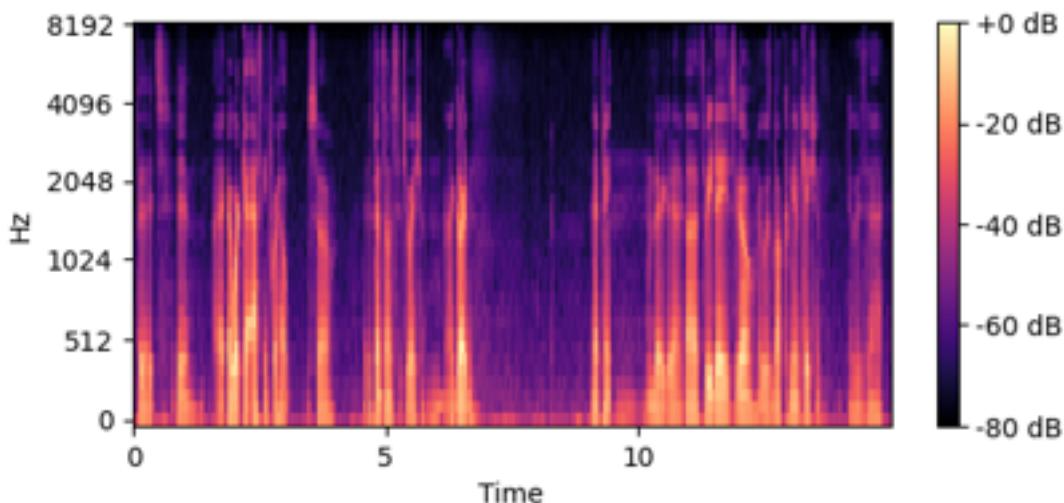

in California and I spent a lot of time with the elders and I talked with them
and they helped me out a lot so I get to hear good stories. Going into mountains
and seeing waterfalls that no one else had seen except for my people.

Segment 4 | Probability: 0.5405

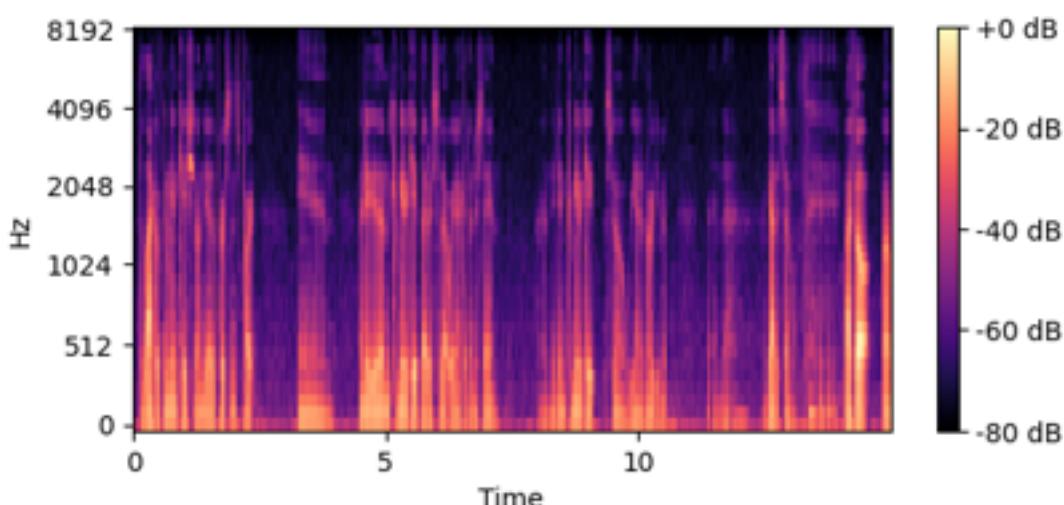

That was the most beautiful thing I think I found. It depends on the situation.
If I'm, if somebody comes to me looking for me to help them, I take control. But
if I need help...

Segment 5 | Probability: 0.5309

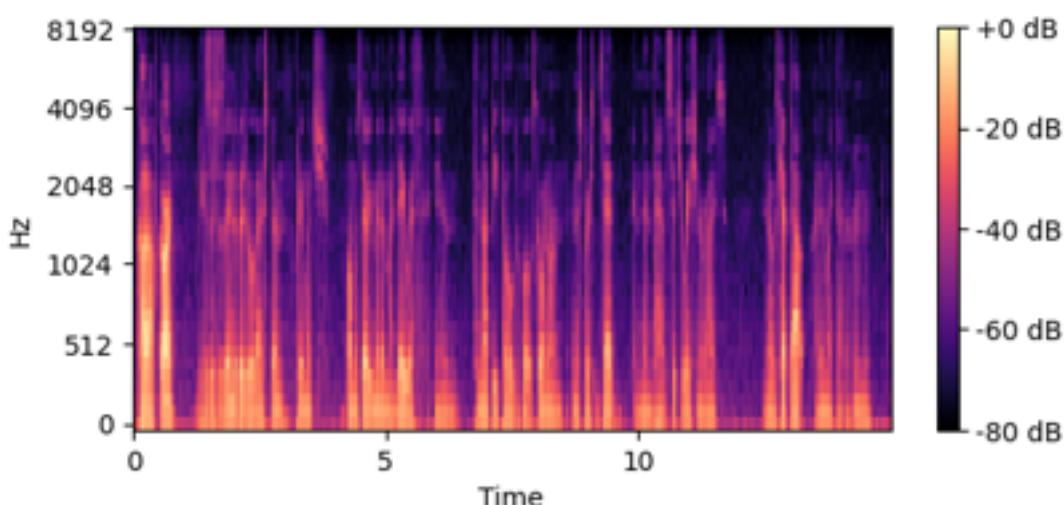

I work at asking for help so it depends on the situation. I garden and I paint.
Three days ago it was about communication.

Segment 6 | Probability: 0.4570

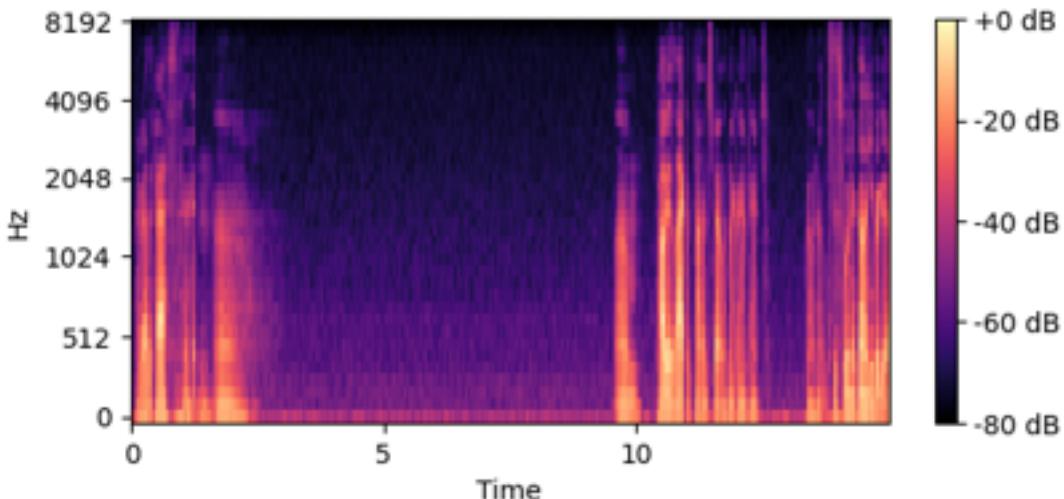

the lack of communication on the other person's part. And I needed them to communicate better so that way I could understand. And they didn't communicate, so we had an argument. And I got it settled. I felt...

Segment 7 | Probability: 0.4657

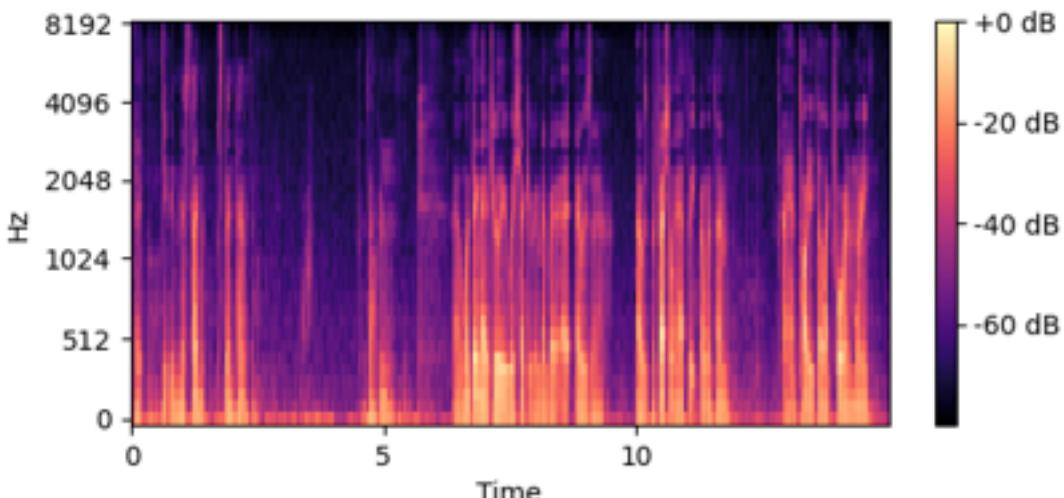

I caught off guard because this is the individual that I spend pretty much almost every minute of my day with and to not be told what was going on in this person's head and then to have a situation arise. And I was kept out. I didn't like that. Mm-hmm.

Segment 8 | Probability: 0.4422

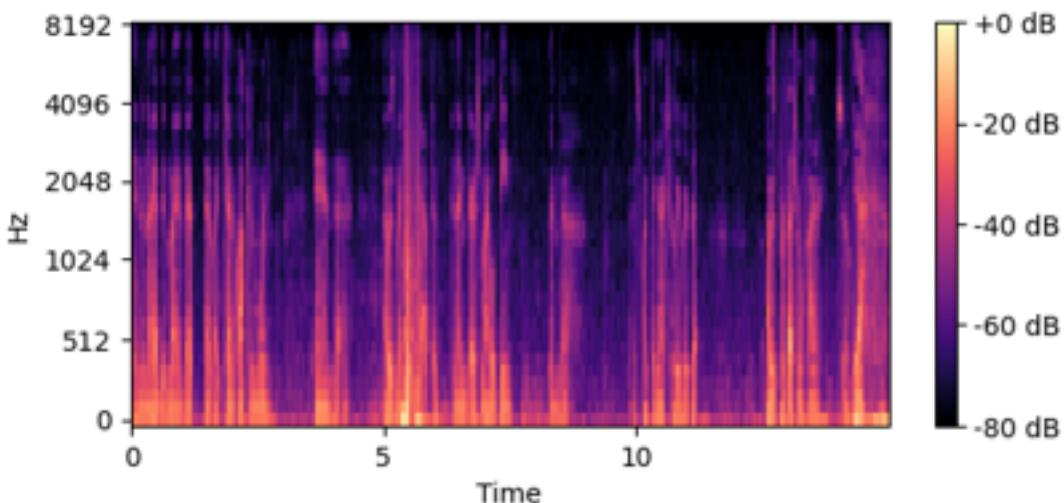

I'd rather pass. Um, probably lack of time spent with my grandparents. Growing up, this wouldn't have gone you, but-

Segment 9 | Probability: 0.4137

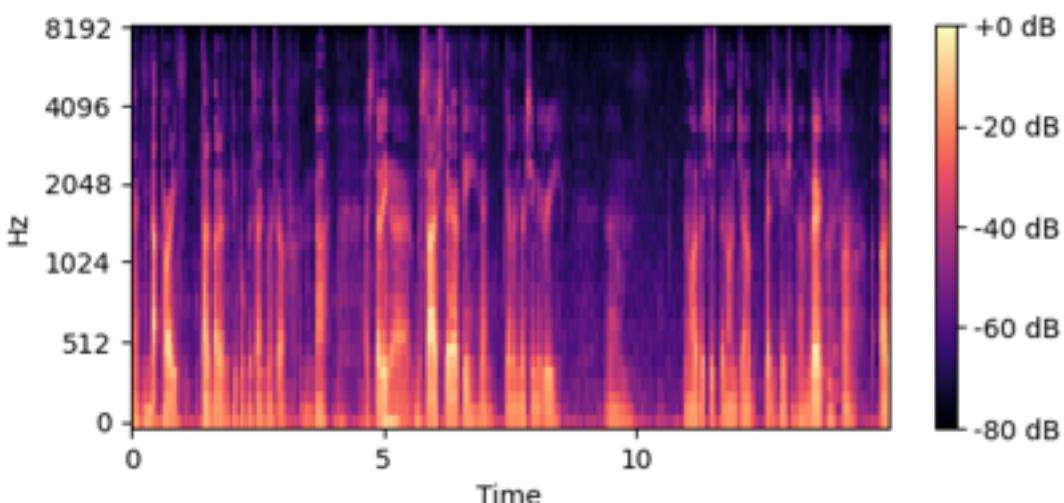

that you didn't miss time to spend time with him. That's all. One thing I truly wish I could remember, I was a professional athlete at one time and I had party till like four in the morning.

Segment 10 | Probability: 0.4365

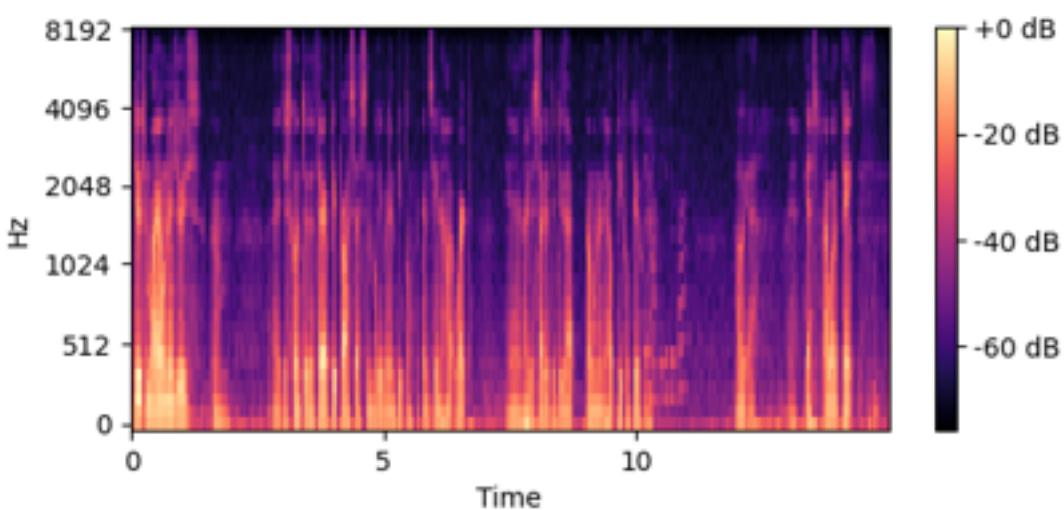

and then I had did my event at like 10 o'clock in the morning and uh... I was my captain and I embarrassed my whole team that's one thing I truly regret I was a professional fighter so yeah

Segment 11 | Probability: 0.4644

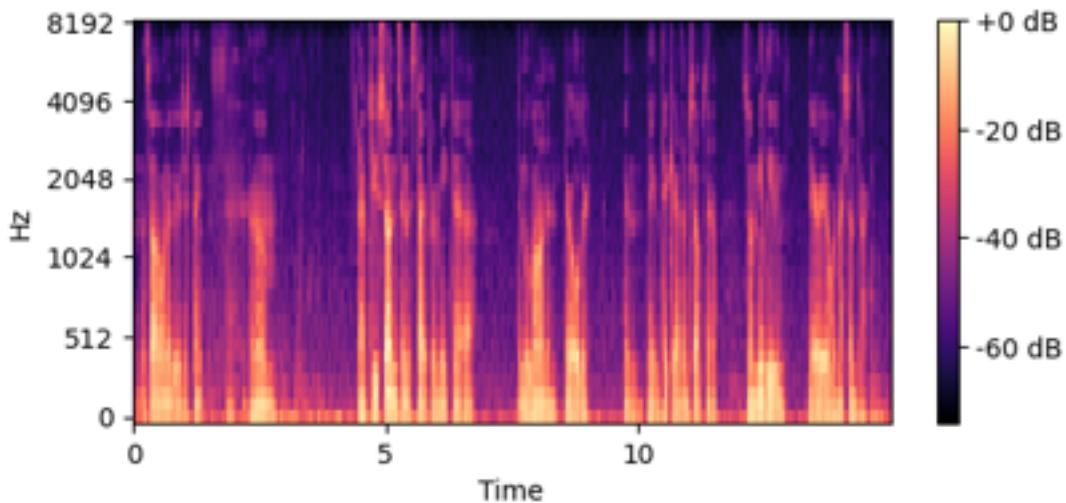

Not party thought about other people besides myself. I studied massage therapy and got my nursing degree And a lot of it's just been on job education very

Segment 12 | Probability: 0.5813

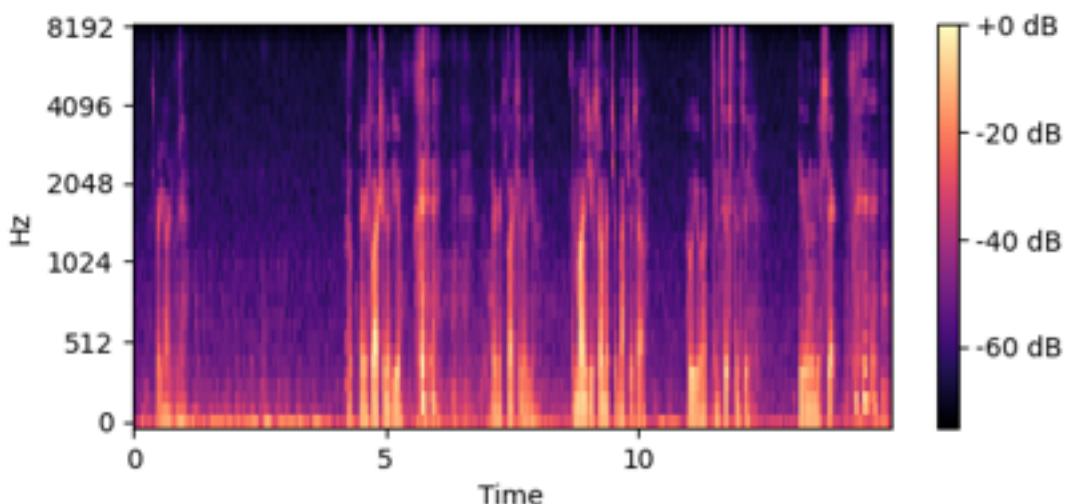

Due to my own injuries, I just went through the therapy process and believed in people and seen how it worked. I decided to do that. I wanted to help people too. Are you happy you did that? Oh yeah. Yes. I want to paint.

Segment 13 | Probability: 0.5082

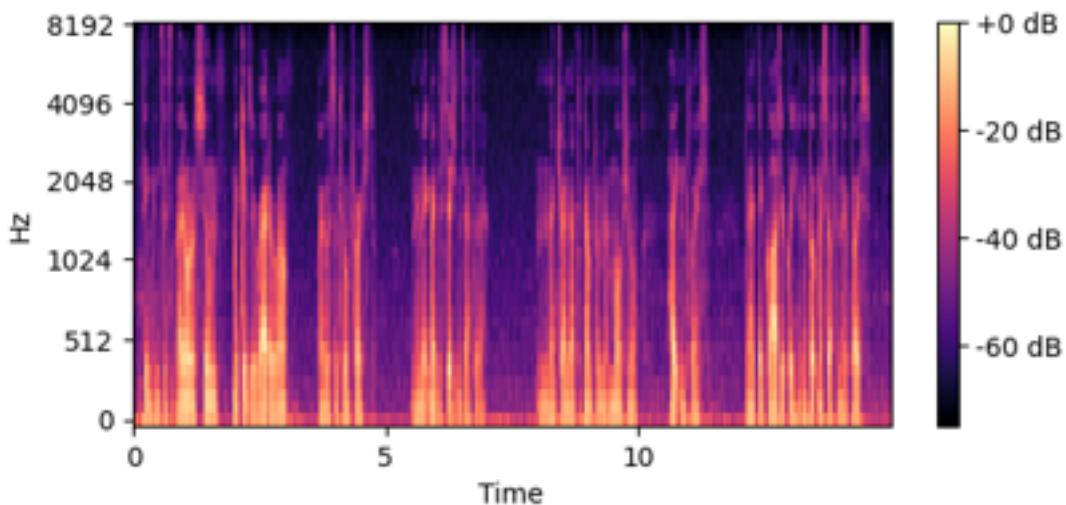

That's all I want to do is just paint. Um, I have two sons and it's tight for me to move on and they're older and they can take care of themselves now. So I'm leaving the area where my sons are.

Segment 14 | Probability: 0.5307

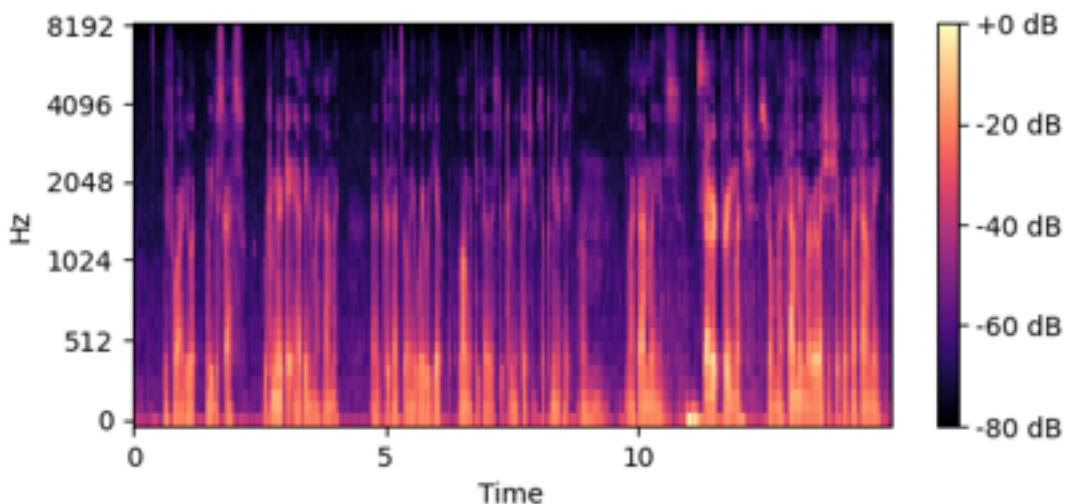

It's pretty hard man. The reflection of you. The reflection of you. It reminds you so much about yourself. Who you are. Consistency. Even when you're sick.

Segment 15 | Probability: 0.5125

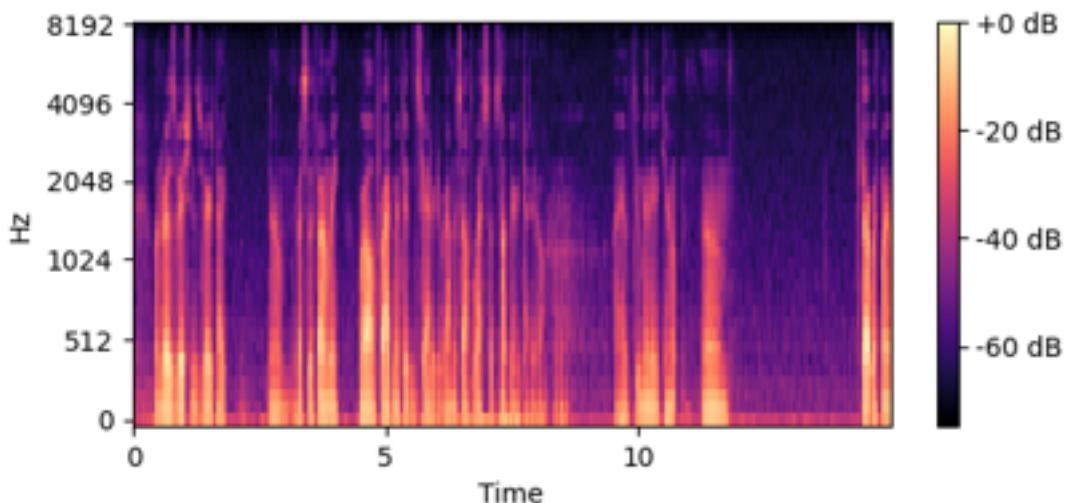

I don't assume my kids are right or wrong. I listen to them first and they make my decisions after that. And I try not to come from an emotional, heightened place. But I think logically and I put myself in their place.

Segment 16 | Probability: 0.4472

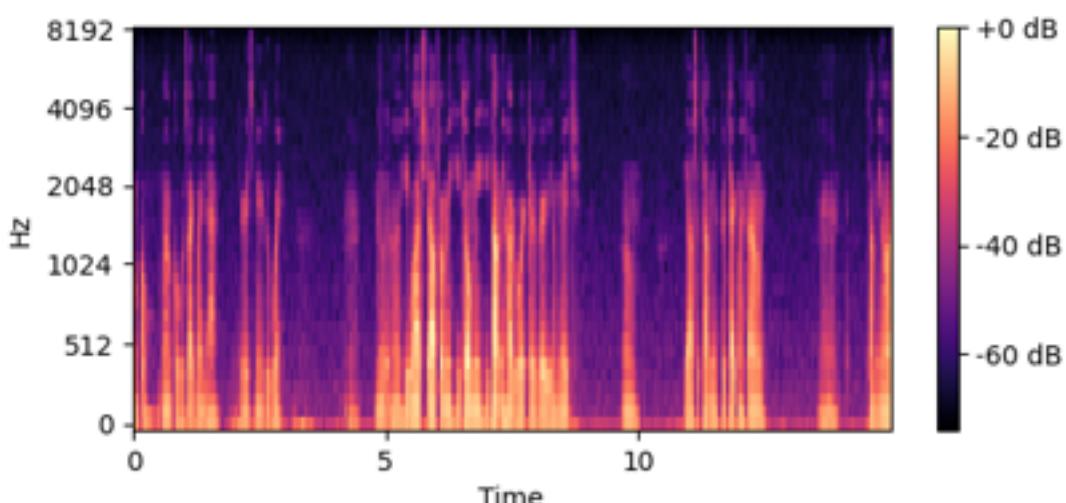

before I do it, we discuss, we communicate heavy in my family. Because that's the only way we get along with each other is through communication. So communicate. My family is severed pretty much. So my family, my relationship with my family.

Segment 17 | Probability: 0.4828

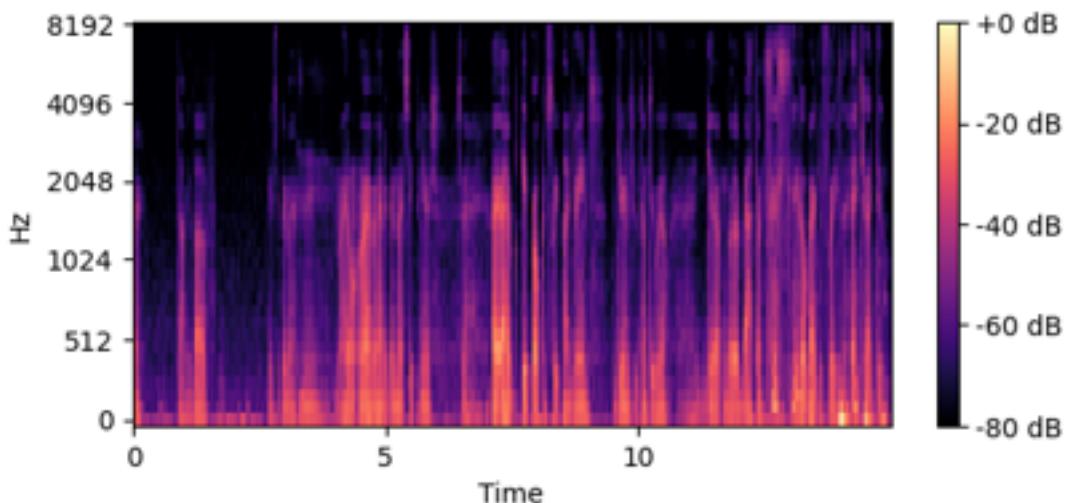

On the reservation is very tight The rest of the family we're all fragmented and scattered around the Southwest so it's not very tight at all. I have too many to count Start with my own

Segment 18 | Probability: 0.4646

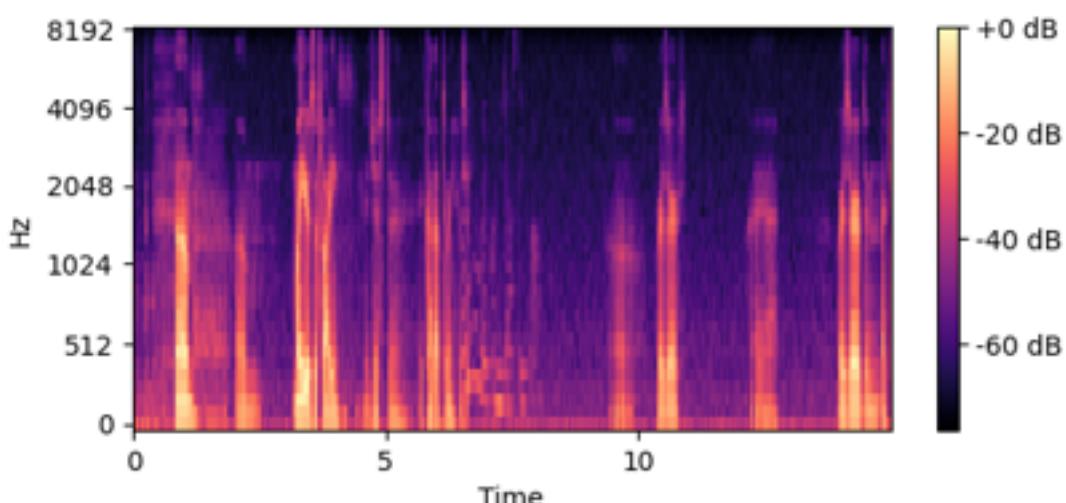

My uncle was like my dad. He raised me in a good way. He watched out for me. He taught me hard work at a very young age. He also taught me to protect my family. He taught me all the time.

Segment 19 | Probability: 0.5766

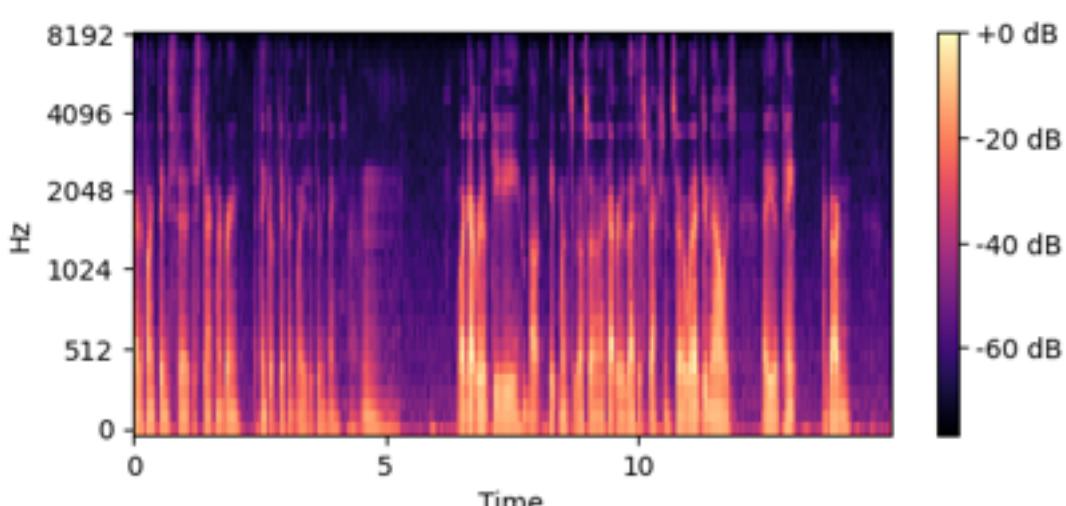

I don't know. I haven't had a good night's sleep in years. I have to keep broken sleep. I have dreams. The dreams will come true. I get up and go to the bathroom and go back to sleep. I tried to.

Segment 20 | Probability: 0.5158

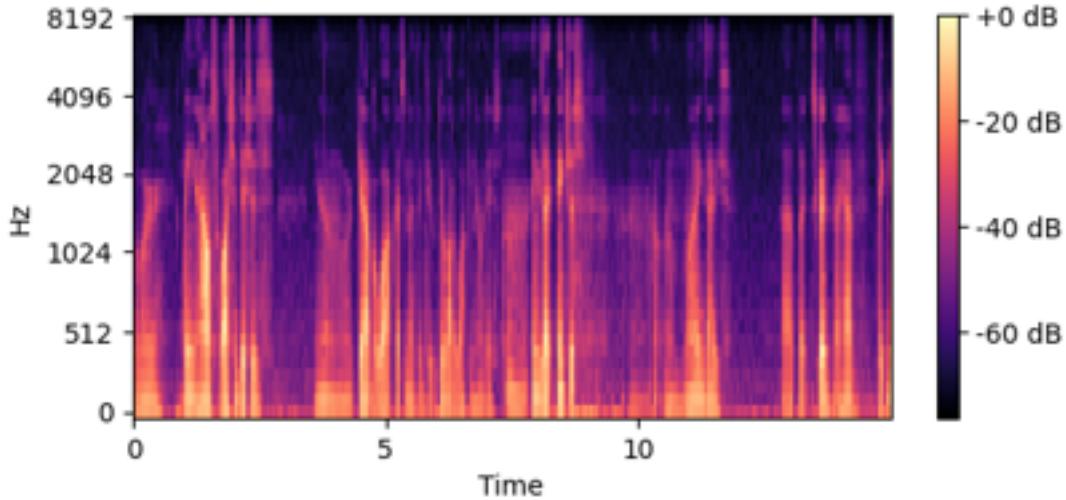

Um, um, my years of fighting just caught up to me. What are you like when you don't sleep well? Reserved. Yeah. Reserved and I-

Segment 21 | Probability: 0.4792

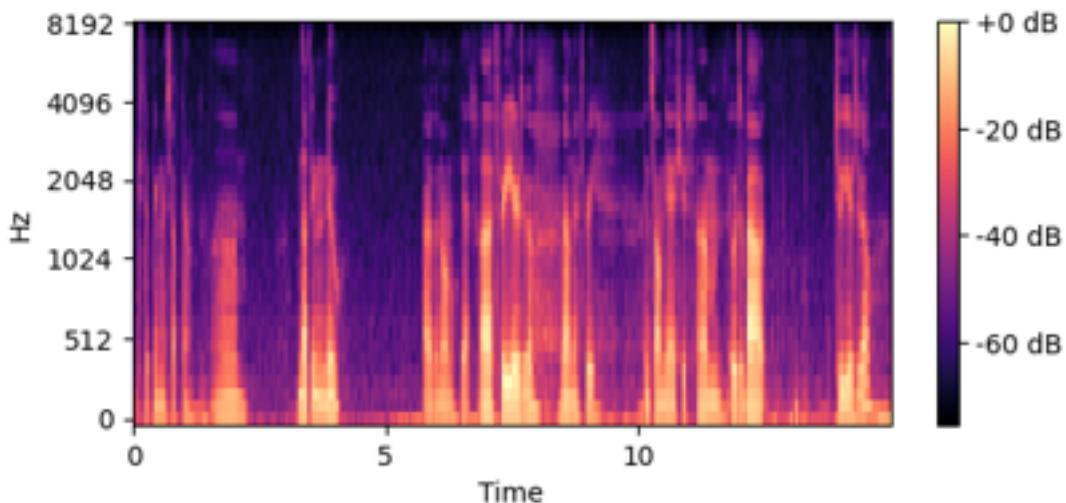

to try to find things to distract my brain, to think of different ways of doing things. Well, I got rid of TV about eight months ago, so I got rid of that distraction. So what I do now is I either paint, I garden.

Segment 22 | Probability: 0.6496

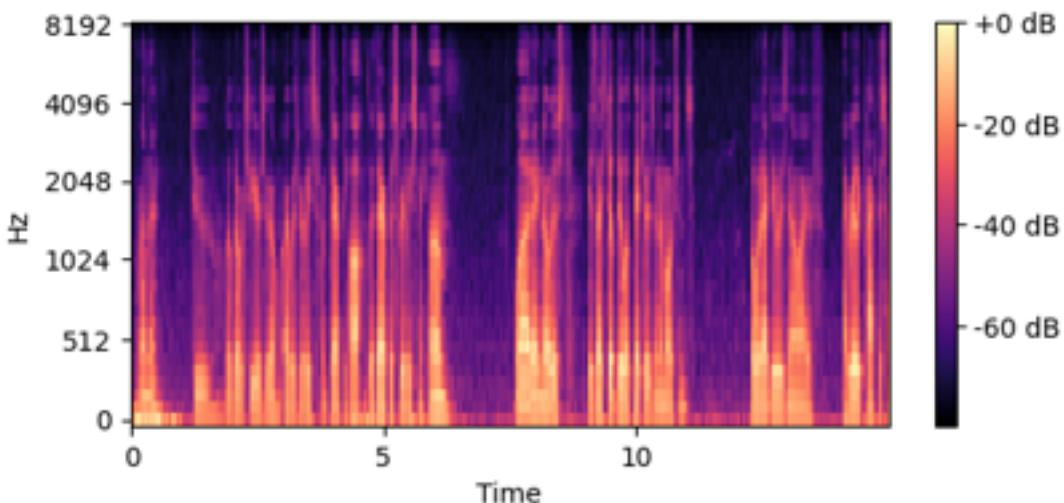

or cleaning the house, washing dishes, or get out and go walk. That's another thing to do, do a lot of walking nowadays. Anxiety, anxious. A lot of anxieties. But it's good, I have techniques.

Segment 23 | Probability: 0.5908

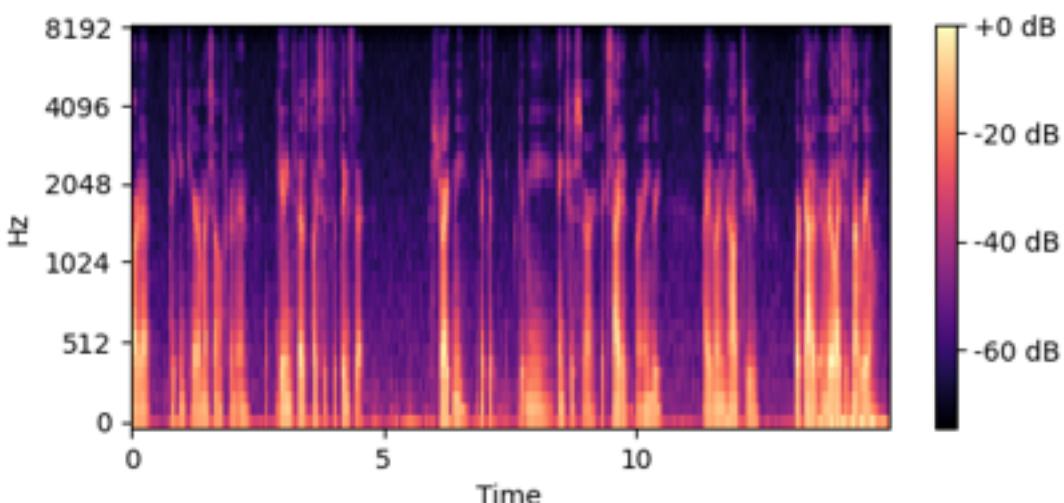

to bring myself down. Nothing new out of the normal. Yes. Three years ago, around there, three insomnia issues. It was about two years ago.

Segment 24 | Probability: 0.6084

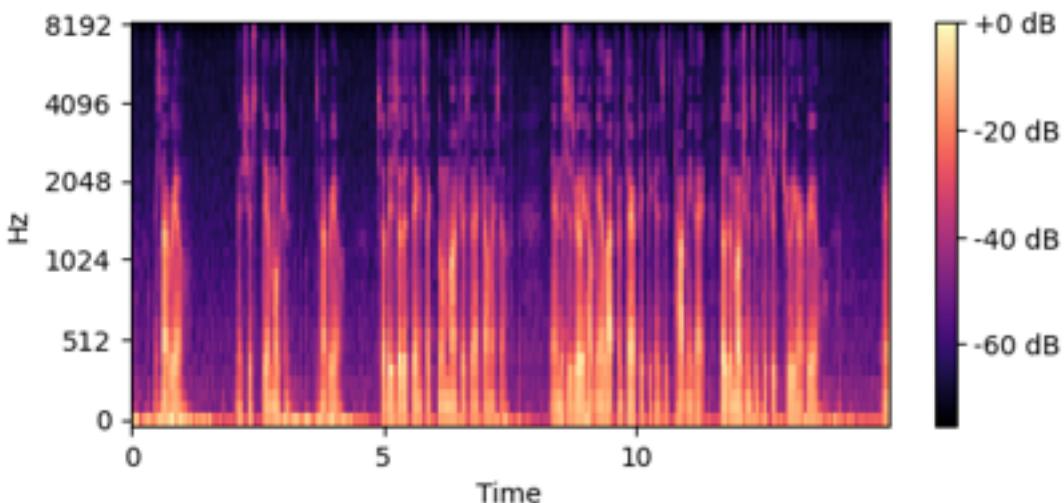

around there two little bit over two years ago I was released from therapy oh
the therapist released me um what I noticed is I still deal with pictures and
emotions but what I do is now I've I really practice

Segment 25 | Probability: 0.6120

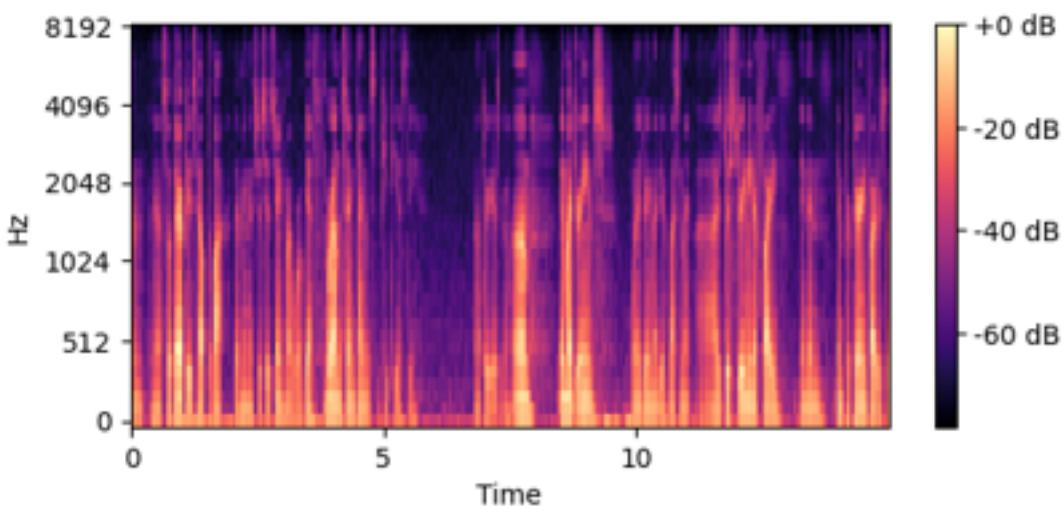

hard at taking care of myself and getting to those places, the things that
strike me, that get me anxious, or excited, or angry. I learned how to work out
of it and realized it's not real.

Segment 26 | Probability: 0.5570

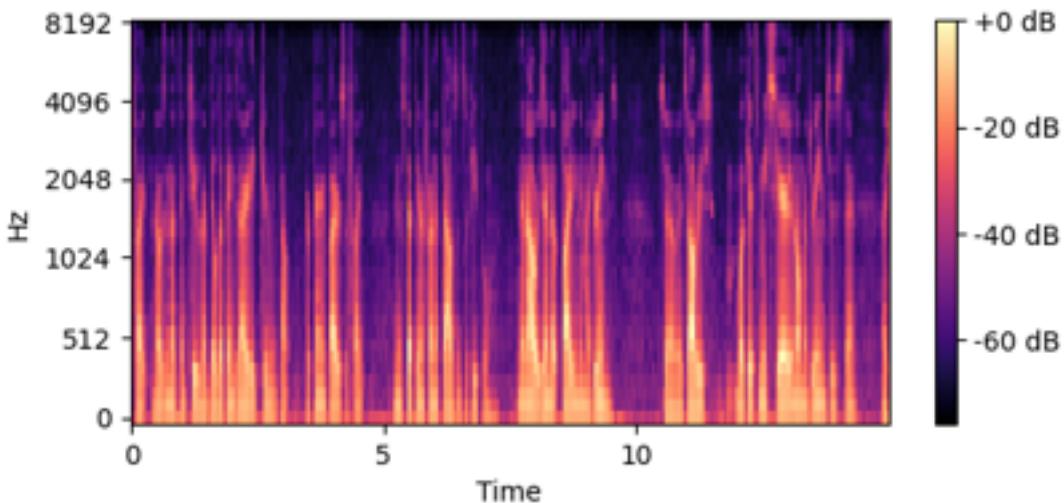

It's not real It's just the emotion. It's not real So these are the things like
little mantras that I tell myself And this has really helped me a lot from
therapy because it's taught me that those emotions and pictures truly aren't
real

Segment 27 | Probability: 0.6162

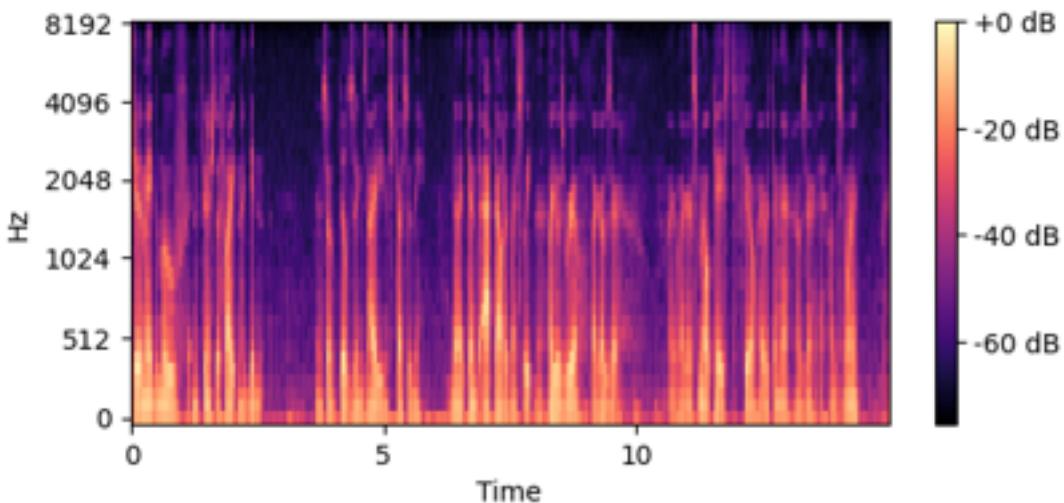

So therapy has helped a lot. I mean it's just it's changed my world. Yes around
the same time as the PTSD Three years ago. Um in my dreams when I dream idea
last night I was just dreaming of fighting and then in preparing fighters to

Segment 28 | Probability: 0.5624

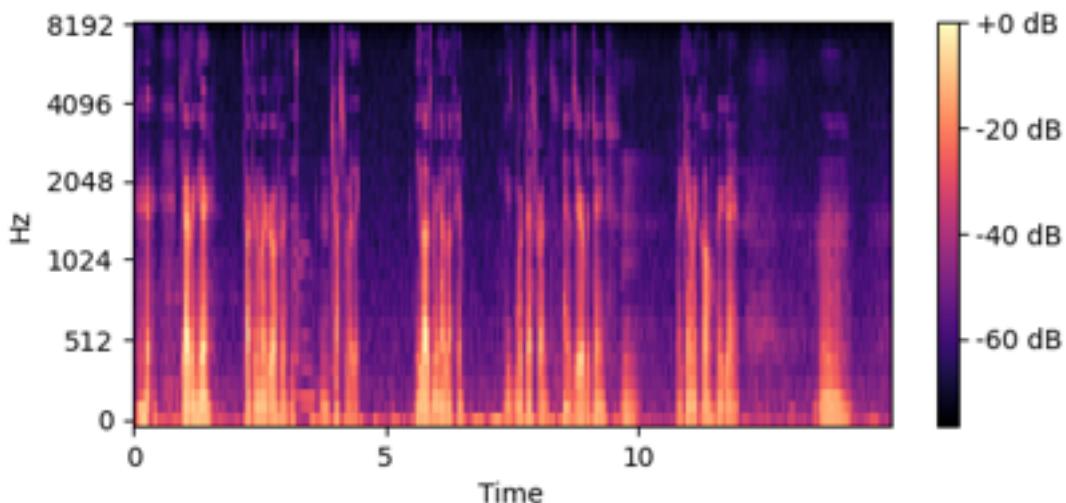

fight. That was another thing too. I build up anxiety, dreaming about preparing fighters to fight and then stepping in front of thousands of people. And then I always end up fighting in my dreams. So it's always what gets me scared in all my dreams is that I should

Segment 29 | Probability: 0.5087

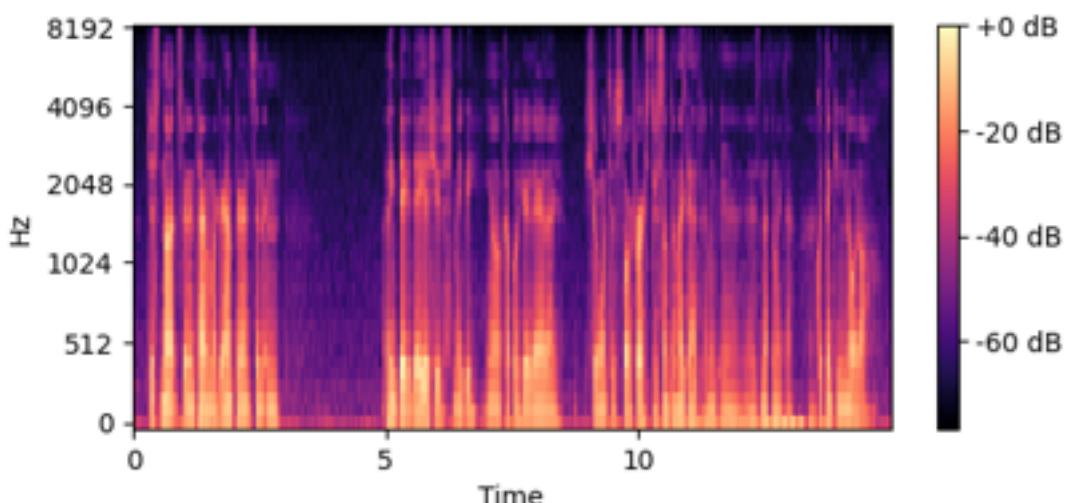

I should have made the move and finished the fight and I didn't. And so it builds anxiety and stress on me. And then I tend to act out of my sleep. Like it was real. Like I was there. Like I smell, taste, feel everything there. I was there. All this morning.

Segment 30 | Probability: 0.4560

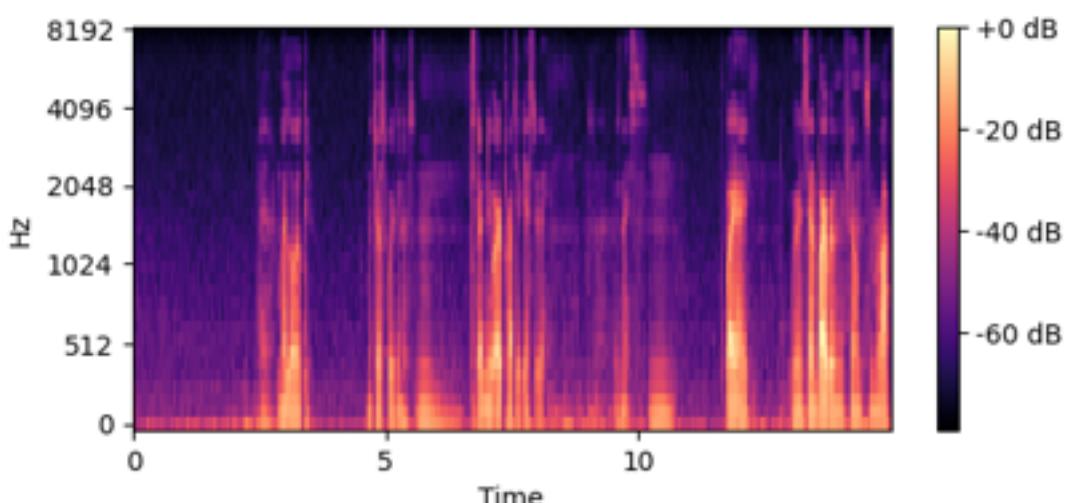

Driving here, talking to my girlfriend, trustworthy. He loves me, I love him.
He's my best friend. I have zero to change. I can't recall, we're good.

Segment 31 | Probability: 0.5789

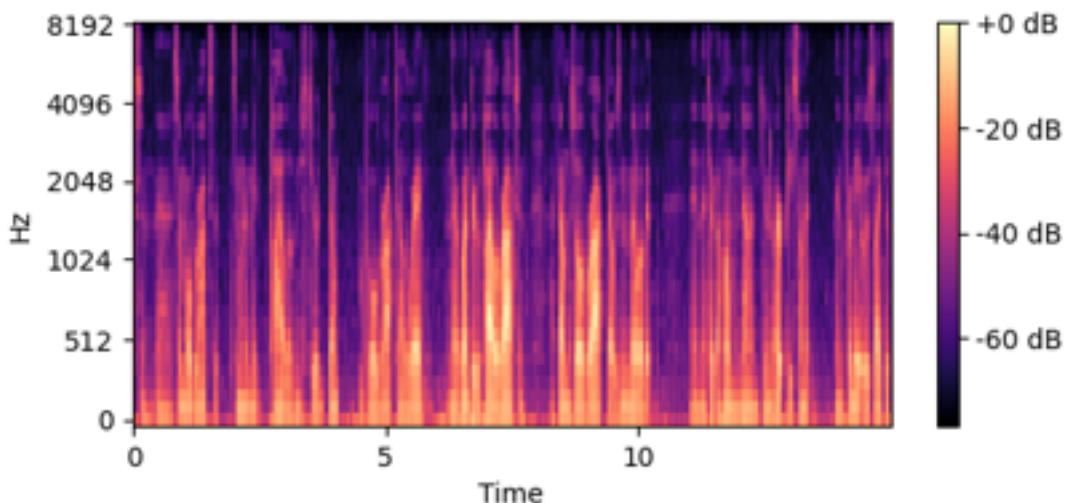

Just not spending time with my grandparents and I think day-to-day issues maybe.
You know, a couple here and there that I should have went to the store first or
something like that. It's nothing like that. Quit thinking you know it all.

Segment 32 | Probability: 0.4306

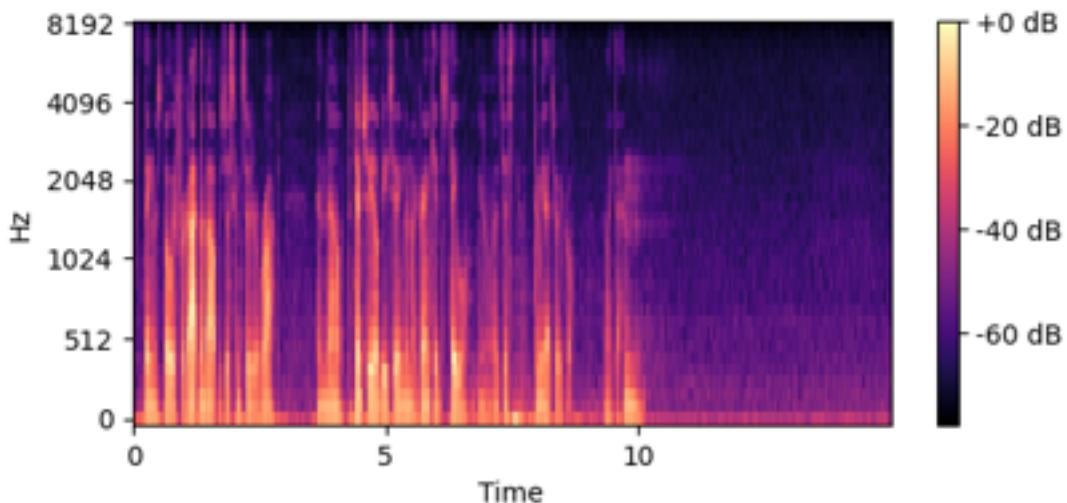

My loyalty. My trustworthiness. I started a new art project yesterday. It was nice. Why are you... We were in Santa Barbara when we filmed some rock...

Segment 33 | Probability: 0.4497

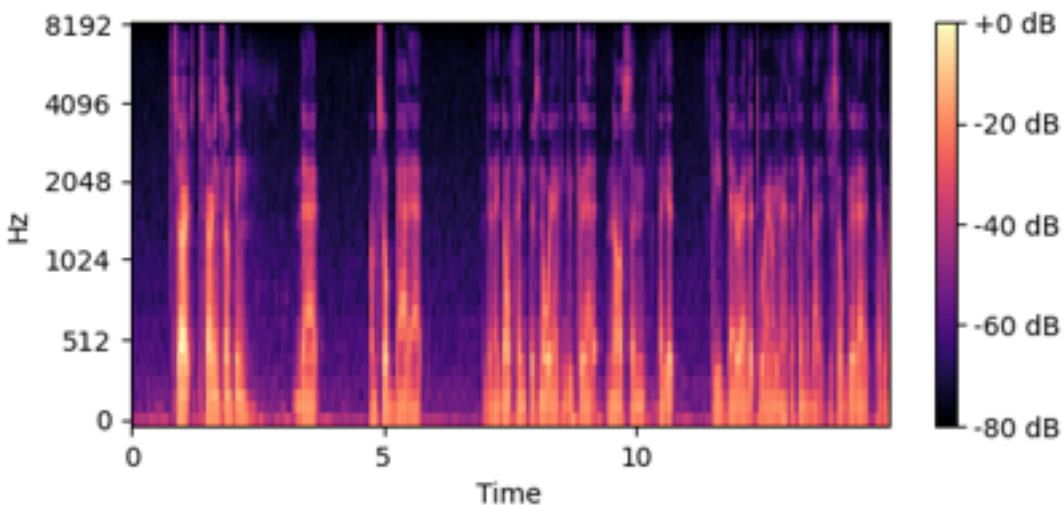

and some old rocks that someone had made pile of and just threw a dump of old rocks out of the way. And I went through the pile of rocks and I found this old rock that was in the middle of it and I took it home and now I'm doing an art piece on it. And for me it was like this.

Segment 34 | Probability: 0.4309

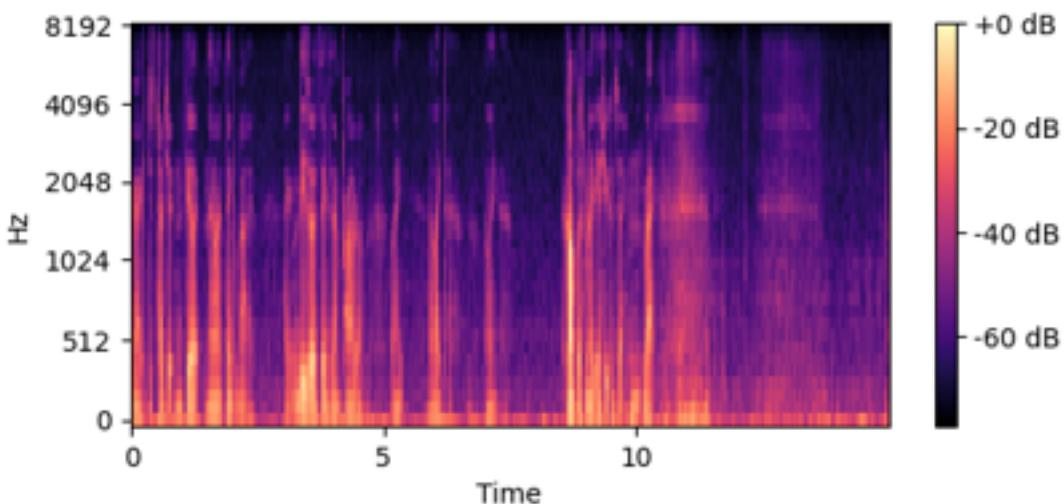

thing was totally forgotten about was just considered a rock. And now potentially you'll be sitting at my grandkids table. You know, it's just, to me that's really cool. I like that.

Segment 35 | Probability: 0.5185

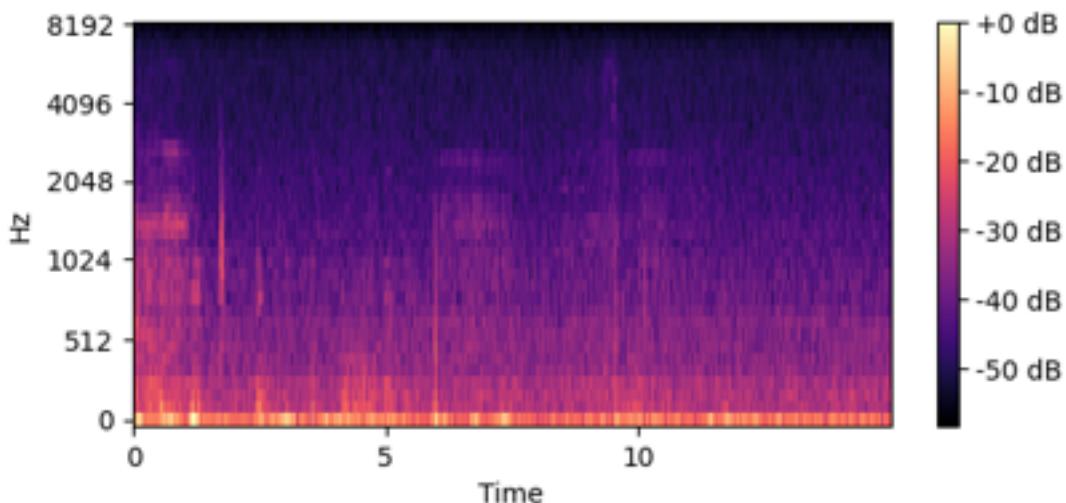

So, starting something that I'm so bad at that I don't think there's no way I can be good at it. And all of a sudden I get to be better at it to where I don't even have to think about it. Just so good at it that way.

Segment 36 | Probability: 0.4242

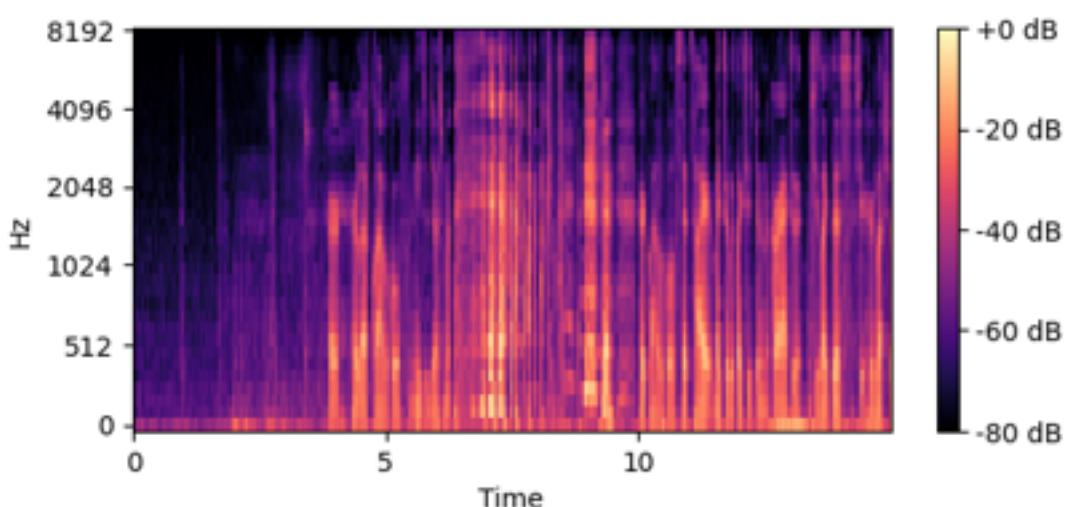

or I could just touch it and feel it, and I don't want to think about it. These are the things that I'm proud of. Like, I like that, I like that.
Accomplishment, I guess you could say. Bye.

Segment 37 | Probability: 0.4604

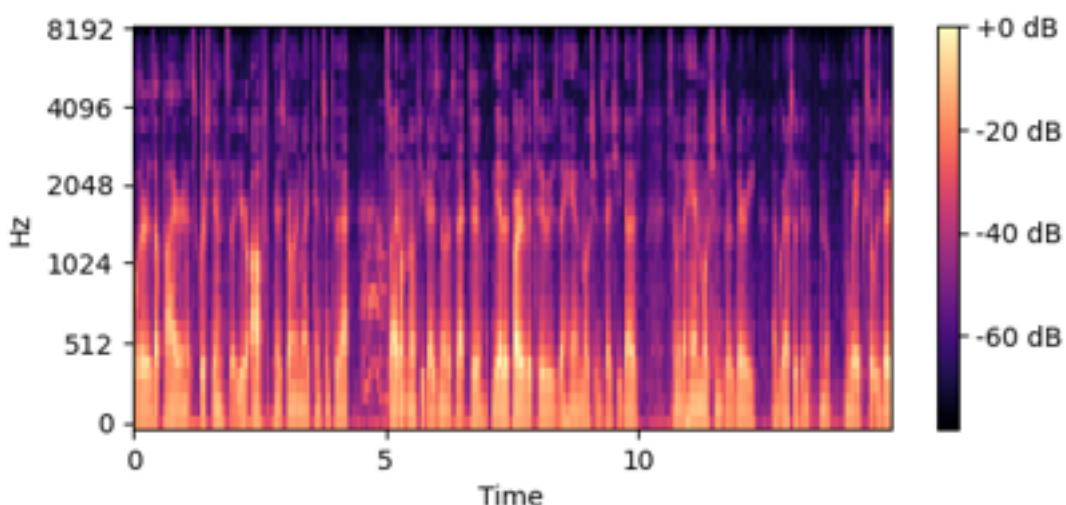

(no transcription)

Segment 38 | Probability: 0.5439

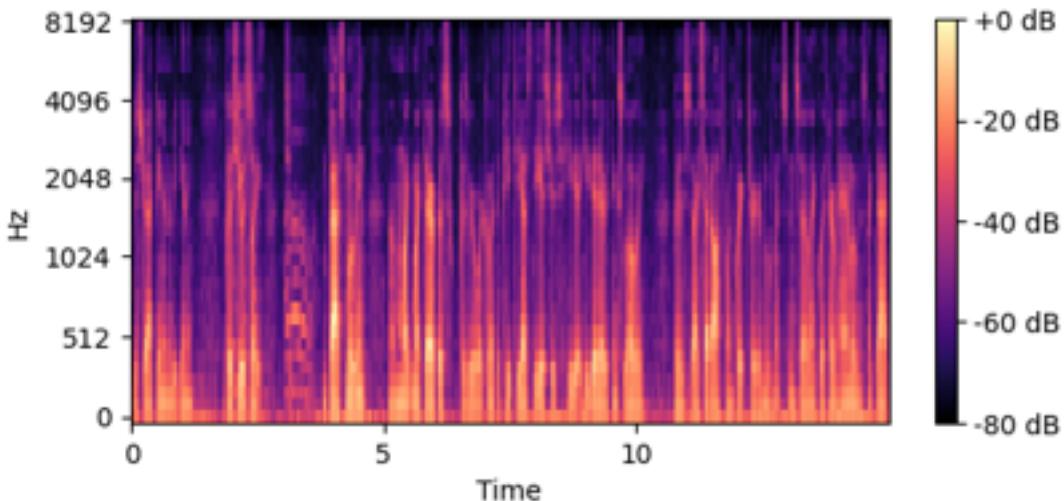

Her left clavicle needs adjustment. Her clavicle sets higher. It makes her look like she's been in a car accident. She's like this. Her left sh-

Segment 39 | Probability: 0.4862

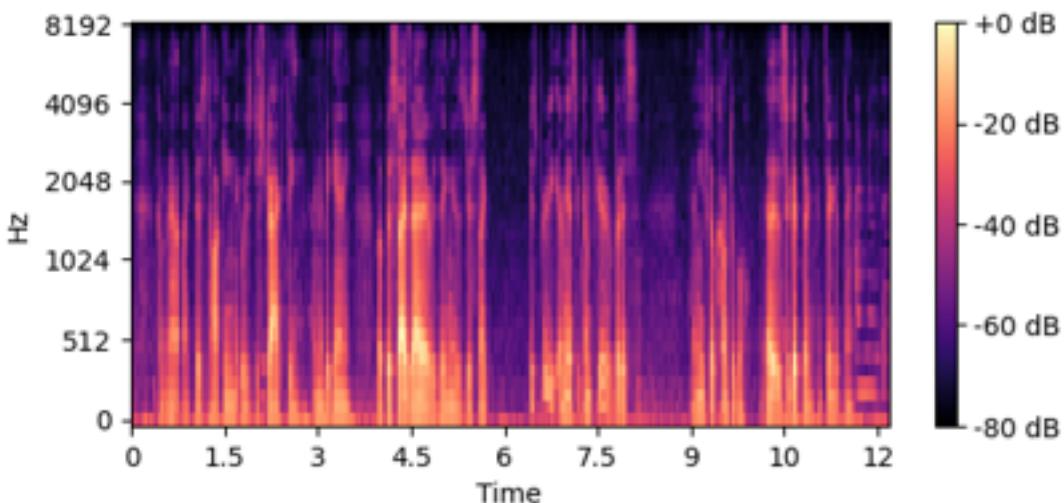

is up higher and it squished in so you're off and it's drawing my attention to that. So I don't know if you guys noticed that too. The other part of it too is the hand motions that she does. Some of the hand motions are very aggressive in a wake so it was very...

Segment 40 | Probability: 0.5573

distracting in the beginning because she was like fast moving like my therapist because we were working with the PTSD issues he did everything slowly because I set off on quick trigger movements and so like with her hand movements like that

Segment 41 | Probability: 0.4794

Coming out like this talking it was distracting in the beginning, but besides that everything is just like it's pretty I mean it's a computer, but it's You feel comfortable. It's a good thing. It's a good thing
